

Nomikos Strigkos

Senior Full-stack Developer / Project leader

Synopsis

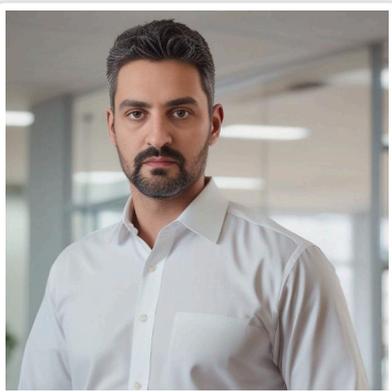

I worked for more than 10 years (2006 – 2016) in the Banking Sector, for the NBG Group, but during this decade I was also involved (as a freelancer) in a wide range of web-based projects, working mainly as a full-stack developer. This period I also worked as a Digital marketing consultant / SEO expert and I was also a seminar speaker for Internet Marketing.

From 2017 until today I have worked as a Web Developer (front-end & back-end) for several significant employers and I was lucky enough to deal with many major & interesting projects. During these years I gained experience and I grew my own portfolio.

I have used many different frameworks & content management systems, with WordPress & Laravel being my favorite options for development.

I am convinced that I possess the proper qualities and qualifications to respond effectively to the requirements of different kinds of projects.

Bio

 Firstname	Nomikos
Lastname	Strigkos
